PROFILE

Software Engineer building complete products from database design and application logic through APIs and responsive interfaces. Primary stack: PHP/Laravel, React, TypeScript and PostgreSQL, with hands-on experience in Docker, Git and CI/CD. Currently pursuing an MSc in Computer Science & Engineering, specializing in Data Science & AI.

PROFESSIONAL EXPERIENCE

07/2026 - Present	Founder & Software Engineer, Flinex Solutions L.L.C. Founded Flinex Solutions to work directly with businesses on client projects, delivering custom web applications, business websites and digital products from planning through delivery and support.	Kosovo / Remote
10/2025 - Present	Full Stack Developer, tempus software GmbH Developed and maintained Laravel APIs and React frontends, delivering features, resolving production issues and modernizing existing application workflows.	Remote
08/2024 - 10/2025	Technical Support, Avedo Provided German-language technical support for domains, email and hosting, troubleshooting issues and supporting SMB customer accounts.	Prishtina, Kosovo
07/2022 - 07/2024	Customer Support & Retention (German), Teleperformance Handled German-language retention and customer service for SKY Deutschland and UPS, resolving account and service issues in target-driven support environments.	Prishtina, Kosovo

EDUCATION

2026 - Present	UBT, MSc Computer Science & Engineering Specialization: Data Science & Artificial Intelligence.	Prishtina, Kosovo
10/2023 - 07/2026	AAB College, BSc Software Engineering Graduated 7 July 2026 with a GPA of 9.07/10.	Prishtina, Kosovo

SELECTED PROJECTS

- Trimmr, SaaS Barber Booking Platform**
Built a Laravel API and React Native apps for iOS/Android, covering booking, authentication, payments, notifications, admin workflows and Docker deployment on Hetzner.
- Jummy.online, Restaurant Website & Online Ordering**
Built and launched a React restaurant website with a digital menu, ordering flow, multilingual content and Meta Pixel tracking.
- EduTrack, Educational Management Platform**
Built a Laravel + React platform for course management, student-teacher workflows and academic resource planning.
- Player Value Prediction - Terminal Edition, ML Tool for Football Player Value Forecasting**
Developed a Python ML tool using linear regression to model football player market-value decline based on age and explore predictions interactively.

SKILLS

Backend: PHP, Laravel, REST APIs, PostgreSQL, MySQL | Frontend & Mobile: React, TypeScript, JavaScript, React Native, Tailwind CSS
Data & AI: Python, Machine Learning | Tools: Docker, Git, GitHub, GitLab, CI/CD | Other: Java, Django
Languages: Albanian, German, English

CERTIFICATIONS

Full-Stack Developer 06/2024 - 01/2025 Për Programera	Mastering PHP Laravel 12 API Development Issued Sep 2025 Udemy	Django Python: Build a Full Stack Website with Features Issued Jul 2025 Udemy	Django 101 Issued Jun 2025 Udemy
IONOS Support Training Avedo	UPS-Shipping & Universal Training 07/2022 - 07/2022 Teleperformance		

AWARDS

- 01/2025 **Top Student, Për Programera**
Selected as a Top Student in the Full-Stack Development Bootcamp for outstanding technical performance.
